

PRESIDENT'S CORNER

These days, you want to be sure your financial partner will be around when you need it most.

With all the bank failures in the news, you want to know that your money is safe and that the advice you get is sound. We've been in the neighborhood for more than 80 years. Unlike many financial institutions, we're still growing strong because we're more about common sense than dollars and cents. That starts by helping you make the right financial decisions and doing what's best for you.

You shouldn't have to 'shop' for financial services. You need to do more than compare price tags to get peace of mind. At Neighbors, we'll take the time to learn what's best for you, then recommend the right thing to do.

Let's face it; we all could use a helping hand from time to time. Neighbors Credit Union is here to help you with all your financial needs. Whether you need a safe place for your funds, a reasonable loan for a new vehicle or just some friendly advice, we are ready to provide the assistance you need.

We offer a wide variety of products and services designed to fit your needs that, truthfully, are similar to those at other financial institutions. However, the difference is we are here to work with you and have your interests in mind. We will never put you into a loan you cannot afford, and we can teach you how to get the most for your hard-earned money.

Whatever your financial goals are for 2010, turn to your Neighbors. We are here to help you – along with your friends and family – have a prosperous new year. Isn't that what you would expect from your Neighbors?

Sincerely,
John Servos, President & CEO
